

Junior 360TM WHIP-TYPE CLEANOUT SYSTEM

- **Portable** — Modular design allows easy movement between bins.
- **Flexible** — Works in any shape and size vessel or bin (round, square, or star).
- **Safe** — Eliminates the risk of confined space entry.
- **Durable** — All-aluminum construction for long, maintenance-free equipment life.

Hazard Monitoring Products

- Bear Scan 24 bearing temperature and belt alignment system.
- MT-400 motion sensors and controls.

BearScan 24/MT-400 Motion Sensor

BearScan 24/MT-400 motion sensor all-in-one enclosure:

- Continuously on-line to alert management of potential problems with overheated bearings and misaligned leg belts.
- Compatible with any Type-T thermocouple sensor.
- Reads up to 24 points of either bearing or belt alignment system.
- Built-in memory for set points in case of power loss.
- Individual operator adjustable set points for each sensor.
- The perfect retrofit for old, obsolete monitors.

TSGC BearScan 24/MT-400 motion sensor.

Ezsentinel 128 HMI/PLC Controller

- Fast and accurate.
- Direct machinery control – stops machinery when danger is present, thereby avoiding costly nuisance trips/shut-downs.
- Economic – Fully functional PLC-based control technology for small and medium sized grain elevators.
- More reliable and safe – No false trips associated with legacy scanner systems; less downtime; safer and more reliable machinery control.

CMC Industrial Electronics Ezsentinel 128 HMI/PLC controller.
