

The Industry

LEADER In HazMon TechnologySM

- ✓ Safer operations & more up-time
- ✓ Expandable networked systems: EZ expansion anytime
- ✓ Industry leading technology... Economically
- ✓ Direct machinery control: Without nuisance alarms
- ✓ EZ Installation... with HazMon in a Box
- ✓ Proven solution: Thousands of sensors installed today

WE TAKE THE HASSLE OUT OF HAZMON!™

HAZMON™ In-a-Box

Everything you need for installation is included, even the screws & nuts!

- Speeds up installation time
- No delays due to missing parts
- Best practices installation & training provided
- Substantially lower installed costs
- Consistent installations from one site to another

1-Wire is a trademark of Dallas Semiconductor Corp.

THE INDUSTRY LEADER IN HAZMON TECHNOLOGY™

All **EZSentinel HMI**s are fully compatible with virtually any machine found in a grain processing facility.

Everything needed for your installation is included; all components, brackets and wiring devices, right down to the screws and nuts.

EZSentinel 128

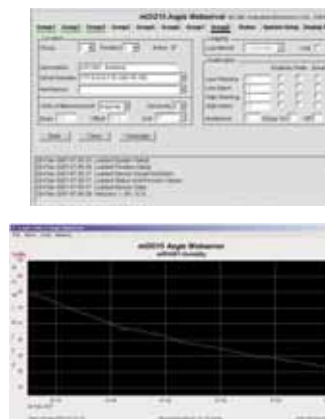

EZSentinel 128

OPERATOR INTERFACE, PLC COMBINATION

- NEMA4X double door enclosure, clear viewing door
- Up to 128 sensors
- Direct machinery control for 15 devices
- Full graphical interface, touch screen
- Complete alarm system
- Alarms logged to SD card memory
- Sensor readings logged to SD memory
- Remote web access

EZSentinel WS1

EZSentinel WS1

OPERATOR INTERFACE / WEB SERVER

- Up to 256 sensors fully web enabled
- View on any PC without any installed software
- 4 alarms per sensor
- Alarm and audible horn outputs
- e-mailed alerts
- Up to 32 sensors can be logged simultaneously
- PLC ready with Modbus TCP/IP interface

More EZSentinel Products

Vibration Sensor

- Continuously and accurately outputs real-time RMS & Peak velocity
- Plug and play into any field interconnect box
- Excellent preventive maintenance tool

mVm001

Digital Input Module

- Monitors 4 digital inputs from switches or relay contacts & connects to the CMC 1-Wire® network system
- Inputs are self-powered, no external power source required
- Intrinsically safe when used with CMC mBC081 bus converter

mDI001

Temperature Lug

- Accurately monitor the temperature of flat surfaces
- Plug and Play into any CMC Field Interconnect Box
- Heavy-duty plated copper mounting lug for harsh environments

mTS011

Analog Input Module

- Connect pressure, vibration, weighing or other analog sensors to the CMC 1-Wire® network system
- Monitors analog inputs of 0 - 10 VDC or 0 - 20 mA
- Intrinsically safe if used with the CMC mBC081 bus converter.

mAM001

Combination Gate Monitor & Controller

- Accurate gate control with position jogging and self-learning algorithm capability
- Requires no I/O to communicate with PLCs
- Requires less wire and conduit than analog feedback devices

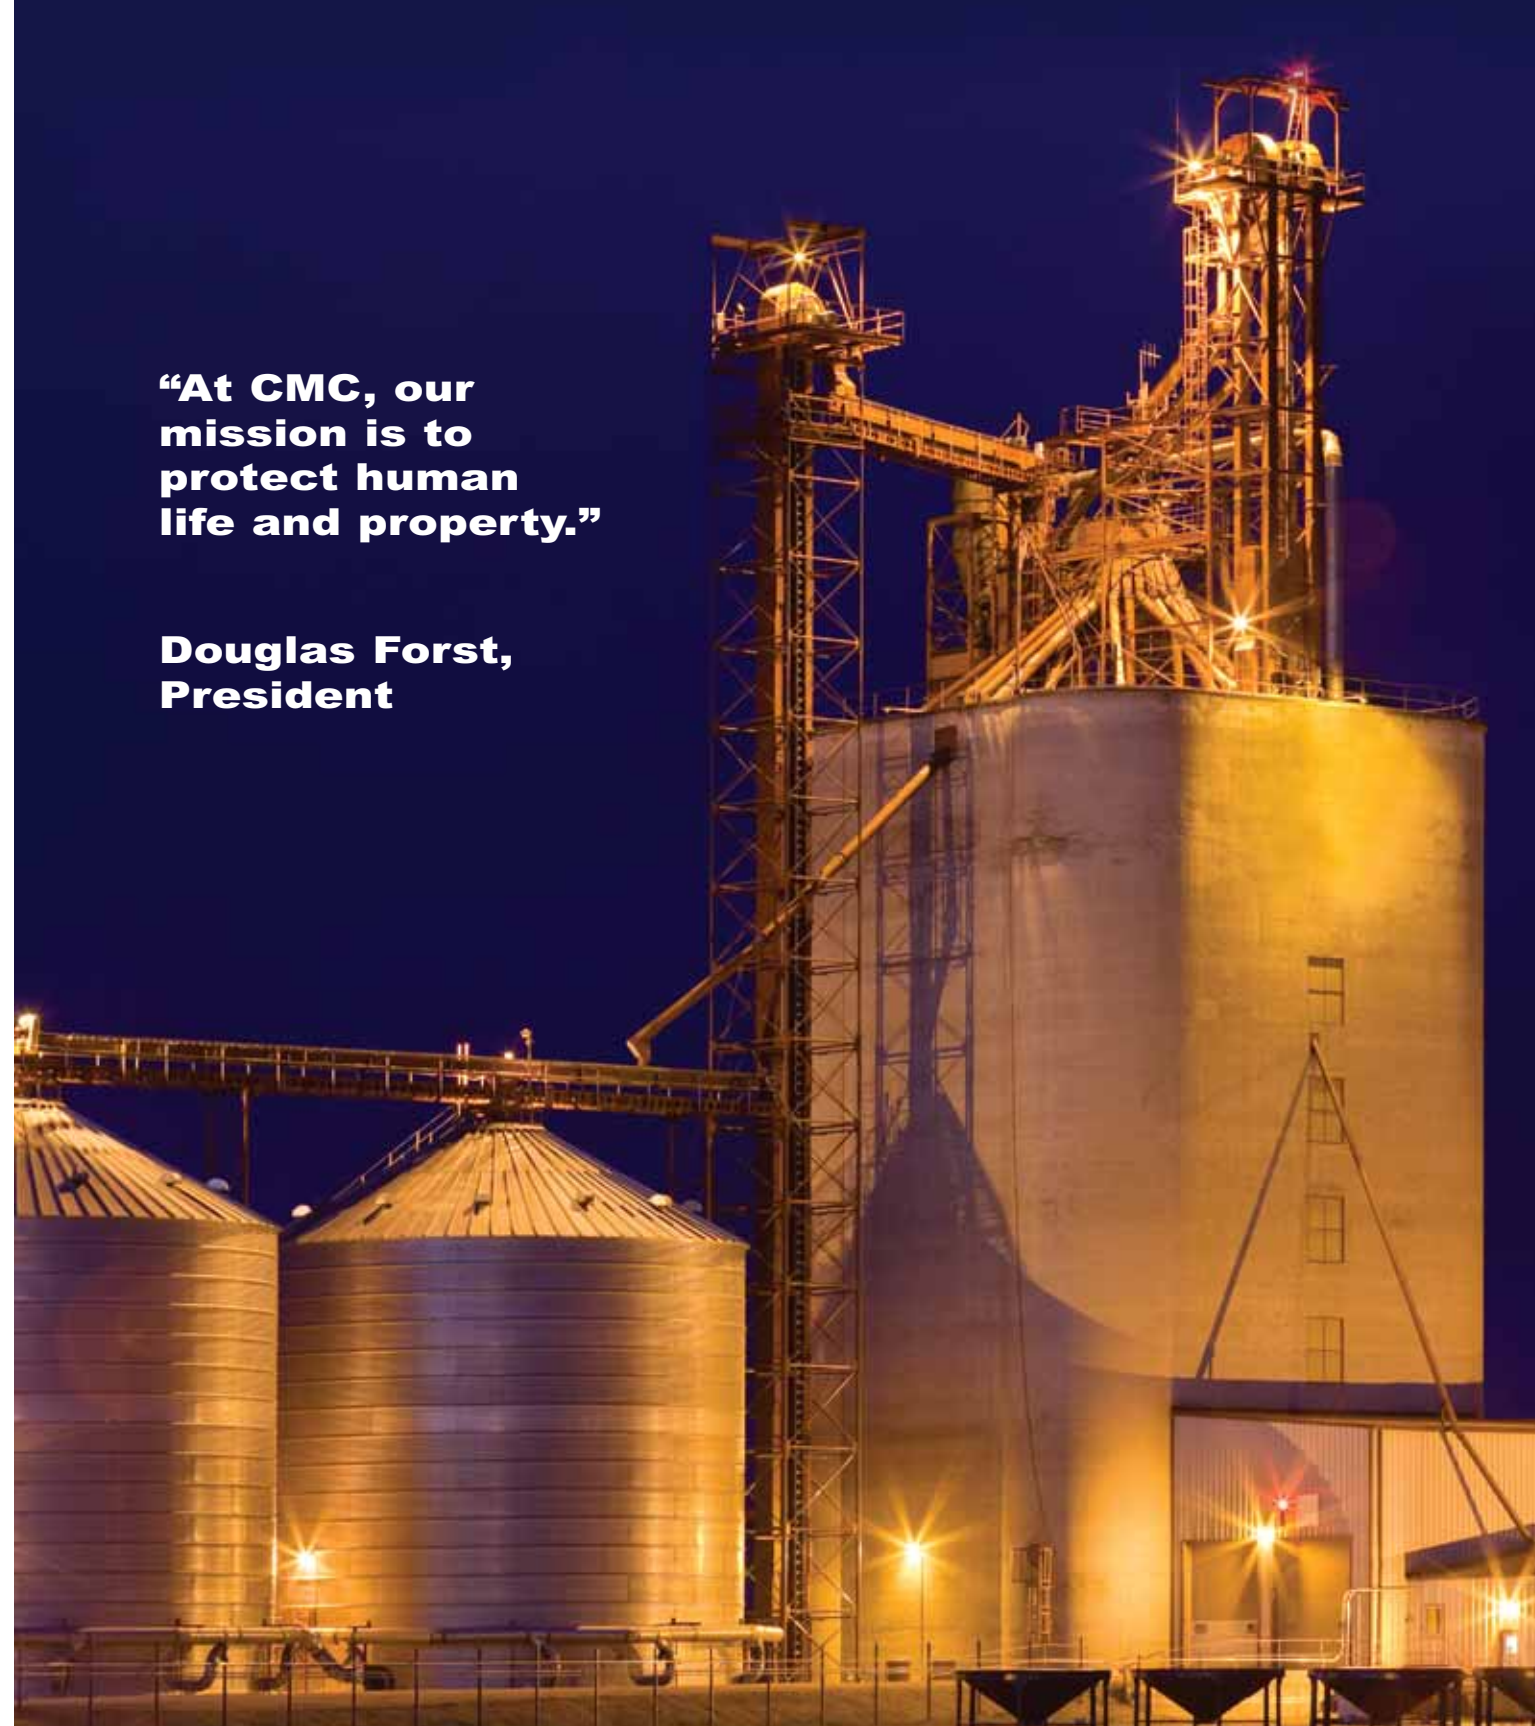

mGP145
