

EZSentinel128 HMI/PLC Controller

- Directly monitor & shut-down up to 15 machines & 128 sensors
- Ethernet/web reporting & user password capabilities
- EZ access to 2 years of trending info, sensor data and alarms

mTC002 Grain Cable Interface Modules

- Seamlessly interfaces & converts existing thermocouple grain cable systems to digital
- EZ phased integration allows affordable upgrade to digital

mGP145 Combination Gate Monitor & Controller

- Accurate gate control with position jogging & "self-learning" algorithm capability
- Requires no I/O to communicate with PLCs
- Requires less wire & conduit than analog feedback devices

"The *hassle* has been taken out of *HazMon*"

- **EZ Install**—Faster/easier installation with complete kits including all mounting hardware
- **Safe operations with less down time**—Reliable products avoid nuisance shutdowns
- **Timely & accurate decisions with machinery control**—Graphical display eliminates guesswork
- **Scalable network**—Easily and economically expandable for any sized operation
